jaber Ansari St. ,Esfahan,Iran

One year warranty and
five years after-sales service

In weaving machines, for various reasons, such as rupture of warp and weft and technical problems, the machine must be stopped and this stop must be done at a high speed so that the fabric does not become defective. The start-stop board has the task of stopping the machine immediately and preventing damage to the fabric.

Raya Sanat Company has been able to produce Dornier start-stop board and is also able to produce this board for various types of weaving machines
